FACTS AND BENEFITS SOFT1

Adhesive free bandage	Does not stick to skin, hair nor wounds.	There is no glue residue.
Only sticks to itself	Can be used together with ointments and creams.	Not necessary to clean the skin for dirt and grease before applying (The wound must be cleaned).
Soft and elastic	It forms easily with the movements of the joints, and is comfortable to use.	Fits under gloves.
Porous	Does not leave "white" skin under the bandage.	Builds less scab.
Absorbent	Absorbs blood.	Ideal for bleeding wounds.
Stops the bleeding	One can stop a bleeding by applying several layers, and by "tightening" to stop the bandage.	Stops the bleeding, closes the wound. Less chance of infections.
Adheres in water	The bandage does not fall off even when wet.	Protects the wound.
Sizes 6 cm x 1 m 6 cm x 5 m 3 cm x 5 m	Various sizes meet the different needs.	The user can adjust the size of the Soft1 bandage where needed.
Blue Soft1	Highly visible.	Used by e.g. the food processing industry. Its color makes it detectable.

All products in this brochure are CE marked.
