- Plastic Surgery

SELF ADHESIVE • QUICK AND EASY TO USE • HIGHLY ABSORBENT • SOFT AND ELASTIC • DOES NOT STICK TO SKIN, HAIR NOR WOUNDS • STAYS IN PLACE EVEN WHEN WET • CAN BE USED WITH CREAM AND OINTMENTS • EASY TO REMOVE • IDEAL FOR WOUNDS TO HEAD, ARMS , LEGS, HANDS AND FEET

## FACTS AND BENEFITS UNI

Self-adhesive bandage	Does not stick to skin, hair nor wounds. Does not leave any glue residue.	
Sticks only to itself	Can be used together with ointments and creams. No need to clean the skin from dirt or grease before applying the bandage.	
Soft and elastic	It is a highly flexible bandage. It does not cause restrictive movement.	
Porous	Does not leave "white" skin under the bandage. Builds less scab.	
Absorbent	Absorbs blood.	
Stops bleeding	Bleeding can be stopped by tightening the bandage. The bleeding is stopped and the wound is closed, resulting in less chance for infections.	
Adheres even when wet	The bandage does not fall off, even when wet. Protects the wound.	

### Sizes

8 cm x 75 cm (sachet)
